EMPOWERING POSSIBILITIES

CISO as a Service

Strategic – Intelligent – Simplified

The global cybersecurity skills gap presents a critical challenge for businesses, as the demand for experienced security professionals significantly exceeds the available supply. With the rapid pace of technological advancements, the increase in the cyber landscape and the constant evolution of cyber threats, businesses face a growing exposure to cyberattacks. The combination of a limited talent pool and an increasingly complex threat landscape underscores the need for robust cybersecurity strategies and expert leadership.

WHAT IS CISO AS A SERVICE?

CISO as a Service offers organisations executive security leadership and strategic guidance without the need for a full-time security executive. This flexible model provides access to a seasoned Chief Information Security Officer on a short-term, part-time, or advisory basis. It delivers critical expertise when needed, to strengthen your security posture, ensuring your organisation stays ahead of evolving cyber threats while optimising resources and costs.

- Development and implementation of comprehensive cybersecurity strategies
- Oversight of risk management and compliance initiatives
- Proactive threat monitoring and incident response planning
- Guidance on aligning cybersecurity objectives with business goals

HOW TO ENGAGE

Engagement Models (daily / monthly)

1. Short demand – hourly / block of hours to draw down
2. Fixed term engagement
3. On-going

HOW IT WORKS AND THE VALUE

SMARTER VALUE

Hiring a full time CISO or certified cyber security staff can be quite costly and burdensome in today's market as there is a shortage of skills globally within the cyber security domain. Under CISO as a service, organisations gain access to the particular expertise they need, when they need it. This model eliminates unnecessary overhead while providing access to top-tier security experience.

DIVERSE SECURITY SKILL SETS AT YOUR FINGERTIPS

CISO-as-a-service provides organisations access to a wide variety of skillsets from CISO strategy & advisory, virtual CISO, security compliance management, cost optimisation, risk management, governance, compliance, team building, security project management, security architecture, engineering and security operations.

ADAPTIVE CAPACITY

CISO-as-a-Service gives organisations the flexibility to scale cybersecurity resources as needed, adapting quickly to changing business and regulatory demands. This ensures optimal protection without the burden of maintaining fixed, full-time staffing.

FORTIFY AND MANAGE

CISO-as-a-service evaluates your organisation's cyber risk posture and helps develop strategies and roadmaps to effectively manage and mitigate cybersecurity risks, strengthening your security foundation.

SIMPLIFY & STAY COMPLIANT

CISO as a Service ensures your organisation meets relevant cybersecurity regulations, standards and government requirements, safeguarding against penalties and legal risks associated with non-compliance.
